#### **DETAILED ACTION**

#### Response to Amendment

1. The Declaration of Eoin J.P. Callan filed on December 5<sup>th</sup>, 2006 under 37 CFR 1.131 is sufficient to overcome the previous rejection to reference (US 6,758,215 to Begum).

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Glass (US 6,412,486).
- 4. As to claim 1, Glass teaches an apparatus that comprises a panel having an inner side 33 (see column 4 lines 1-5) and an outer side 31 (see column 4 lines 15-20) and at least one fastener affixed to the panel for attaching the mask to a wearer (see figures 1 and 4; column 3 lines 50-55 and column 5 lines 1-10), the respiratory mask further comprising at least one display originally visible on the outer side of the panel (see figure 4; column 3 lines 5-10 and column 5 lines 35-50).
- 5. As to claim 2, Glass teaches an apparatus wherein the display comprises graphical matter (see figure 4 and column 5 lines 35-50).
- 6. As to claim 3, Glass teaches an apparatus wherein the display comprises text (inherently an advertising message is described as text; see column 5 lines 35-50).

Application/Control Number: 10/706,521 Page 3

Art Unit: 3772

7. As to claim 4, Glass teaches an apparatus wherein the display comprises graphics and text (inherently an advertising message is described as text and graphics; see column 5 lines 35-50).

- 8. As to claims 5 and 6, Glass teaches an apparatus wherein the display comprises graphics depicting a national flag or a smiling face (see column 5 lines 35-50; Glass clearly states that the printing can include colors, patterns or design; inherently design is defined as a national flag or a smiling face).
- 9. As to claim 7, Glass teaches an apparatus wherein display comprises information regarding a pharmaceutical product (see column 5 lines 35-50; Glass clearly states that the printing can be an advertising message; inherently the advertising message can be defined as information regarding a pharmaceutical product).

# Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3772

- 12. Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glass (US 6,412,486).
- having an inner side 33 (see column 4 lines 1-5) and an outer side 31 (see column 4 lines 15-20) and at least one fastener affixed to the panel for attaching the mask to a wearer (see figures 1 and 4; column 3 lines 50-55 and column 5 lines 1-10), the respiratory mask further comprising at least one display originally visible from the first side of the mask, the method comprising providing information regarding specified characteristics of the wearer in the at least one display of the mask (see column 5 lines 35-50; Glass clearly states that the printing can be an advertising message; inherently the advertising message can be defined as providing information regarding specified characteristics of the wearer in the at least one display of the mask).

The claimed method steps would have been obvious because they would have resulted from the use of the device of Glass.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nihir Patel whose telephone number is (571) 272-4803. The examiner can normally be reached on 7:30 to 4:30 every other Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Bianco can be reached on (571) 272-4940. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
